Solar

Solar

The solar panel is a device that converts sunlight into electricity. It is made of silicon, a material that is abundant in nature. The solar panel is made of many small cells, each of which is made of silicon. The cells are connected together to form a panel. The panel is made of many cells, each of which is made of silicon. The cells are connected together to form a panel. The panel is made of many cells, each of which is made of silicon. The cells are connected together to form a panel.
